- Cantonese: Fluent
- Mandarin: Fluent

PROFILE SUMMARY

A meticulous and analytical professional with a strong background in data analysis and organizational skills, certified in Microsoft Azure AI Fundamentals, and proficient in Microsoft PowerPoint (Office 2019). Adept at problem-solving, I have a foundational understanding of network security, which complements my critical thinking and ability to effectively navigate and resolve challenges as demonstrated during my Hong Kong Cyber Security Flag Challenge.

Being systematic means approaching tasks with a clear structure and method. During my virtual internship with Forage (EA Project Management), I was faced with complex, multi-step tasks that required careful planning and execution such as KPIs analyisis and mobile game user separation. Instead of rushing to complete everything at once, I broke each project down into manageable parts and completed them one by one. Though the experience, I was able to accuracy and allowed me to stay organized throughout the working or studying.

I am naturally sociable and enjoy interacting with diverse groups of people. For instance, during my study tours to Beijing and Mongolia, I had the opportunity to engage with people from different cultures and backgrounds. These experiences taught me how to quickly build rapport, adapt to new environments, and communicate effectively across cultural boundaries.
